

SECUREONE NEWS

SEPTEMBER 2026

AI • Security • Innovation • Partnerships

Welcome to the second edition of the SecureOne Newsletter!

As we move through the summer season, we hope those who have enjoyed a well deserved holiday return refreshed, while those still looking forward to their break have an enjoyable holiday ahead.

We wish everyone a productive, successful and enjoyable season.

In this edition, we are pleased to share the latest updates from SecureOne, including partner collaborations, company news, team highlights, and much more!

We hope you enjoy reading this edition and thank you for being part of our journey!

A Word from Our CEO

Dear Reader,

AI is becoming part of our daily lives in countless ways. It's one of the most transformative technologies of our time and it will change our lives forever. AI is also changing the Security Industry.

The technology we use in our UVIScan and PlateCatcher systems, is more and more AI based.

Let AI help us to improve the quality of our Security Systems and make the world a safer place!

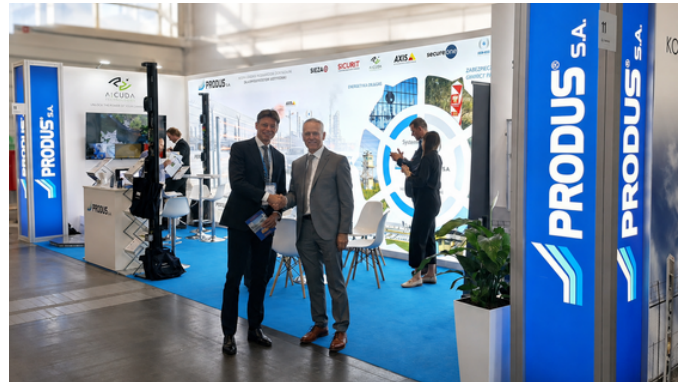

Kind Regards,
Arno Hulshof – CEO

SecureOne Supports PRODUS S.A. at Securex Security Fair 2026 in Poland

SecureOne International was proud to support our trusted partner, PRODUS S.A., at Securex Security Fair 2026, held from April 14–16, 2026, in Poland.

The event provided an excellent opportunity to showcase the UVIScan Rapid Deployment system once again and demonstrate its portable, efficient capabilities for temporary checkpoints and the detection of dangerous objects.

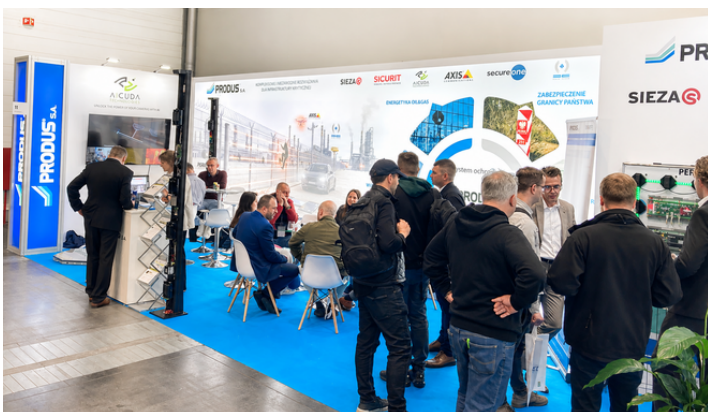

Arno Hulshof, CEO of SecureOne and Wiesław Łątko, VICE CEO of PRODUS S.A.

Working together with PRODUS S.A. allows us to combine their strong understanding of the Polish market with SecureOne's global experience in vehicle inspection and security solutions. By combining our strengths, we provide reliable security solutions that bring innovation and expertise to our customers. We sincerely thank everyone who visited the stand and showed interest in our solutions.

We look forward to joining our partners at future events and further strengthening our successful collaborations around the world!

About our Partnership

The partnership began more than two years ago when SecureOne was invited to support ZNZ in Hungary by providing a UVIScan Rapid Deployment system for live demonstrations.

The event brought together representatives from government and industrial security, generating strong interest in UVIScan and resulting in several requests for on-site demonstrations. Since then, our partnership has continued to grow, built on mutual trust, technical expertise, and a shared commitment to delivering innovative security solutions to the Hungarian market.

Partner Spotlight:

Our collaboration in Hungary

In this edition, we are pleased to introduce ZNZ Biztonságtechnika Kft., one of SecureOne's valued partners and a leading provider of advanced security solutions in the Hungarian market.

Established in 1991, ZNZ specialises in the distribution and installation of security equipment and systems, complemented by safety technology consulting and professional training.

As a key player in the Hungarian security market, ZNZ serves government institutions, law enforcement agencies, financial institutions, and other critical infrastructure such as the Budapest Airport.

Partner Spotlight: Our colaboration in Hungary

Projects Highlight:

Mercedes-Benz factory in Hungary 2024

The project started in 2024, when the customer was looking for a reliable Under Vehicle Inspection System for the cargo entrance after experiencing performance issues with system installed in previous facilities from another manufacturer based in China.

SecureOne supplied the UVIScan PRO flush-mounted Systems integrated with PlateCatcher ANPR, Automatic Comparison, traffic light and XS Line Traffic Light modules.

We are proud to support one of the world's leading automotive manufacturers and to contribute our expertise in reliable security solutions for high-security industrial environments.

Paks Nuclear power Plant facility – UVIScan replacement 2026

This year, one of the projects we have been supporting together with ZNZ is the upgrade of the Under Vehicle Inspection system at the Paks Nuclear Power Plant, Hungary's first and only operating nuclear power station.

The facility's existing Under Vehicle Inspection System, supplied by a manufacturer from Germany, had been experiencing ongoing operational issues. As a result, SecureOne was selected to provide a more reliable replacement with the UVIScan PRO Heavy-Duty Housing.

Partner Spotlight: Our colaboration in Hungary

ZNZ created a fun and creative 2026 calendar, featuring different customers and their products throughout the year, with each month inspired by a famous film or TV series. SecureOne also made an appearance in the calendar with one of our products. Such a fun and original idea!

ZNZ July 2026 Calendar | Dedicated to SecureOne

"Working with SecureOne has been a positive experience from the very beginning. Over the past two years, we have successfully delivered several important projects together, supported by SecureOne's reliable technology and outstanding technical support. SecureOne team has always been available to provide expert guidance whenever needed, ensuring smooth installations and successful project delivery. We appreciate the trust, professionalism, and commitment that define our partnership and look forward to continuing our collaboration in the years ahead."

The People Behind SecureOne

At SecureOne, our people are at the heart of everything we do. In each edition of our newsletter, we highlight a team member whose knowledge, dedication, and passion help drive our success.

In this edition, we put the spotlight on Matthew Bowden, our Technical Consultant. Matthew's dedication and unwavering commitment have made a lasting impact on our team, our customers, and our business. We are proud to celebrate more than 10 years of service and the valuable contribution he continues to make to SecureOne!

Matthew Bowden born in London, United Kingdom, in 1969, his journey began with a passion for electrical engineering. After earning a degree in Electrical Installation from the University of East London, he took his first steps into the security industry as a trainee engineer, a role that laid the foundation for an extraordinary career.
