

# STOWAWAY DETECTION

Everywhere around the world, we are facing an increased security issue with stowaways hiding inside or under trucks.

Our Company, SecureOne in Eindhoven, The Netherlands, is specialized in development, manufacturing and worldwide distribution of UVIScan PRO Under Vehicle Inspection Systems.

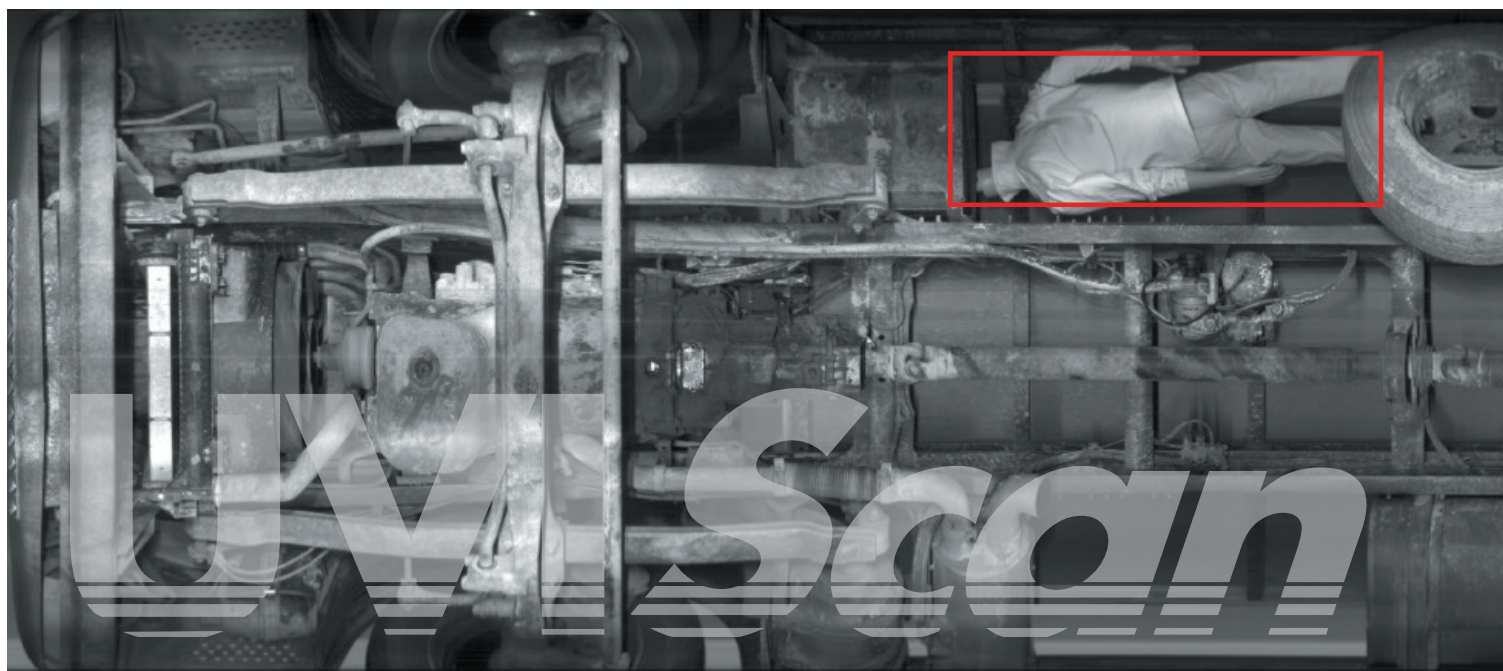

Our UVIScan PRO Stowaway Detection system is the perfect tool to detect stowaways hidden under trucks. It is the ideal system to be used at ferry terminals, border crossings, correctional and mental facilities, military camps, etc. Many stowaways have already been detected by using our UVIScan PRO technology.

UVIScan PRO includes:

- In-ground Scanning Unit with heavy duty housing and guiding rails;
- Control Unit to connect with the Scanning Unit;
- Workstation with extra wide monitor, and Processing Unit including pre-installed LINUX based UVIScan PRO software;
