
Company

Our company, SecureOne International BV, is specialized in development, manufacturing and worldwide distribution of special security to "high security" customers, such as government agencies, military sites, power plants, VIP, embassies, prisons. The main product of SecureOne is UVIScan (www.uviscan.com), a very innovative system to check the underside of vehicles to be inspected for the presence of explosives and / or weapons.

Vacancy

We are looking for an enthusiastic and motivated:

Support Engineer USA

Who will find a challenge in supporting our customers in the USA. The Support Engineer will perform demonstrations to customers, advise them about the technology and proper application, and support our customers during installation and use of the system. Also the Support Engineer will support customers in case of technical issues and support maintenance of the installed systems.

Required

- Secondary vocational education, mechanics and/or electronics degree;
- Preferably experience in software configuration of similar applications;
- A passionate engineer who enjoys showing the technology to customers;
- An enthusiastic pioneer, able to work independent and accurate;
- Flexibility towards the customer and Service minded;
- Prepared to travel across the USA, and so now and then to The Netherlands;

We offer

Excellent salary and benefits, you will get the opportunity to develop and to grow your skills and experience. SecureOne consists of a small, international team with an open, informal culture and short communication lines. You will work in a pleasant and professional environment.
