

Company

SecureOne International BV, is a small but reputable and rapidly growing company. We are specialized in development, manufacturing and worldwide distribution of special security systems. The main product of SecureOne is UVIScan (www.uviscan.com), a very innovative system to check the underside of vehicles for the presence of explosives and / or weapons. Our customer base includes prestigious and high profile clients such as the EU Council in Brussels, the Italian Presidency of Council of Ministers in Rome, Burj Khalifa tower in Dubai, Saudi Aramco, the National Bank of Thailand, USAF in Washington DC, Toyota, to name a few.

Internship

Our company is offering an internship for an enthusiastic student, who will find a challenge in an interesting market research project. Data centres are being developed everywhere in the world, and they require our security systems. It will be your task to assess the market, identify the key companies, their planned data centre locations, find the right contact people, check their security needs and report to the commercial team of SecureOne.

Required

- 6 months availability;
- A team player with proactive and flexible attitude;
- Fluent in English language, both in writing and in speaking;
- Capable of executing a project independently and with own initiative;

We offer

You will get the opportunity to develop and to grow your commercial skills and (international) experience. SecureOne consists of a small team with an open, informal culture and short communication lines. You will work in a pleasant and professional environment.
